

Precision Side-Staple Binding Machine
FASTBIND BOOXTER TRIO™

Versatile applications:

- Photo books
- Company presentations
- Catalogues
- Yearbooks
- and more!

BOOXTER TRIO™

Ergonomic and compact design
Semi-automatic operation
Binds any format up to SRA3

Affordable high quality binding

Fastbind BooXTer Trio™ takes a simple concept, electronic stapling, and turns it in a versatile, high quality binding solution for on-demand finishing. With a minimal investment, you can create hard and soft cover books, strip-back books, or just simple stapled paper blocks such as handouts in a wide range of formats.

BooXTer Trio™ can be expanded with the optional Fastbind Cover Setter™. The cover setter is an easy-to-use positioning tool for adding hard covers to your paper blocks. The Fastbind Cover Setter™ can be mounted to BooXTer Trio™ or used as a standalone unit.

Quick, easy and reliable

Compact and quiet, BooXTer Trio™ is ready to work at the flip of a switch. Built-in shelves at the back of the unit can be used to keep your supplies ready at hand. Using flat clinch staples, the powerful electric stapling head binds photo paper and coated stock as easily as normal copy paper. This unique side-stapling method ensures consistent placement of staples along the spine of your paper block. The result is always a strong, square and clean bind.

The semi-automatic operation of BooXTer Trio™ simplifies your finishing process, making it ideal for serial production. Just place the paper block in the machine and press the start button. BooXTer Trio™ recognizes the sheet format automatically and accurately places staples based on the selected program (manual, single-sided, double side). Custom programs can be added as needed.

Complete finishing solutions

Fastbind also offers a large range of affordable pre-made covers and binding supplies to help you get the most out of your BooXTer Trio™. Combined with other Fastbind products, you can further expand your finishing possibilities:

- Use Fastbind Casemakers to make printed hard covers
- Use Fastbind Creasers for creasing printed soft covers
- Use Fastbind End sheets to mount covers to your paper block

Specifications

Binding method	Precision side stapling
Staple type ¹⁾	Flat clinch; 5000 staples per cassette Staple No. 10 for normal stock Staple No. 8 for coated stock
