- Stripe-back binding, with transparent or printed cover
- Binding without covers, just use the printed paper as the front and back cover!

Making professional quality books is easier than ever!

Making professional quality books has never been easier than now with the BooXTer Zero Mini™ from Fastbind, the most trusted name in book binding. The New BooXTer Zero Mini™ is a compact, fast and easy book binding system for hard cover or soft cover books. It's innovative design and low cost makes it the premier table top book binding system available today! Make elegant professional photo books or other book products, no training required!

Environmentally friendly

Fastbind BooXTer Zero Mini™ does not need to warm up and has no set up time - just start to bind when you're ready! It is environmentally friendly: no electricity is needed and no chemicals are used. The BooXTer Zero Mini™ is the result of more than 30 years of experience of designing heavy duty book binding systems. It's built to last and has 5 years warranty*.

Get organized and work ergonomically

The Fastbind BooXTer Zero Mini™ is a production workstation with a footprint of only 35x42 cm (13.8"x16.6") and it has storage for multiple staple sizes as well as all the cover materials for the job at hand. It has clear illustrations to help select the correct size of staple, with step by step instructions so anyone can make a perfect book, every time!

Professional books, fast and easy!

One of the most important features of the Fastbind BooXTer Zero Mini™ is its precision linear side stapling, offering a 100% secure bind no matter what paper you use. This is most important in photo books where the image print quality is of utmost importance, so the paper thickness, grain

and coating may vary job to job. Traditional binders can not deliver the secure binding for every type of paper that is a standard feature of the BooXTer Zero Mini™. With the ability to bind up to 120 pages** at a maximum speed of up to 120 books** per hour, the BooXTer Zero Mini is the right choice.

User friendly design

Fastbind BooXTer Zero Mini™ includes a professional heavy duty stapler - rugged in construction, but feather light to use. The table is designed with built in book block spacing system to make the placement of the book block in the cover perfect every time! The printed guides instruct you to find the right cover size and placement and the positioning of the staple is automatically aligned for the user perfectly for a wide range of many book sizes, including A4 and Letter, portrait and landscape, sized books.

Specifications

Dimensions: H/W/D 3/37/37 cm (1.2"/14.6"/14.6")

Patents and design patents are pending. Product information as of November 2011 and is subject to change without notice.
