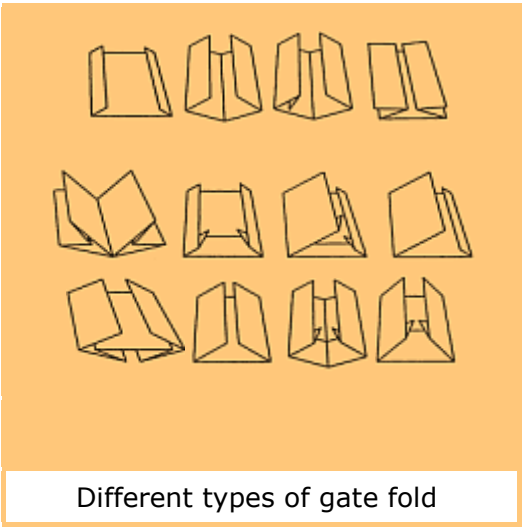
MB-System CAS 52 Mail - Modular folding solutions for direct mail



Different types of gate fold

Typical Users for MB-System CAS 52 MAIL

From simple leaflets to creative mailing with options for code reading, fold gluing, labelling, perforating, slitting, scoring etc.

Possible Interfacing

Combination with EDP finishing equipment: Inters tackers, bursters, rotary and guillotine cutters. For these modules, paper is directly conveyed onto the roller table. Depending on requirements, the modules can be placed in two feeding positions: either inline or at an angle of 90¡Æ to the roller table. Varying in feed heights are bridged by the height-adjustable interface IF 42.

Connection to modular sheet feeders: Suction feeder SF with high-capacity loader BSA 50000(up to A4 / letter size, landscape), suction feeder SF with interface 32/C (up to A4 / letter size, landscape), cut-sheet preloader (up to A3 / legal size, landscape)

Specifications:

Maximum paper format	SRT 52 SRT 38	42 x 42 cm 42 x 38 cm
Minimum paper format	SRT 52 SRT 38	10 x 18 cm 10 x 10 cm
Minimum fold length of fold plates		3.5 cm
Speed		200 m/min

Unit 11, Barbeque Terrace, Dytchley Road, Kayalami, Midrand
