PERNUMA PERFOSET I/L, II/L and II/LA Symbol Punching Machines

for marking, securing and/or cancelling forms like tender documents for example, identity documents, savings books or cheque cards

Among the hand-operated machines you may choose between the following models :

PERNUMA PERFOSET I/L

with an insertion depth of about 75 mm and a max. capacity of about 50 sheets of 70 g paper which corresponds to a paper stack of 5 mm height. The standard hole diameter is 8 mm. The desired symbol is fixed.

PERNUMA PERFOSET II/L

with an insertion depth of about 110 mm and a capacity of about 60 – 80 sheets of 70 g paper which corresponds to a paper stack of 8 mm height. The standard hole diameter is 12 mm. – If the machine would be equipped with a standard symbol with a diameter of 8 mm 100 sheets of 70 g paper could be marked in one operation which corresponds to a paper stack of 10 mm. – The desired symbol is fixed.

The machines are equipped with an adjustable side and rear gauge in their standard version in order to facilitate an exact positioning of the punching.

For an extra charge they can be manufactured

- with a special symbol for which we need a sketch from you
- with an "Euro"-hole for punching blister packings (Please see the samples on the reverse of this page. - The Euro-hole "E" is only available with our model PERFOSET II/L.)
- as notching presses with a fixed rear and an adjustable side gauge (Please see the notching samples on the reverse of this page.)
- with differing symbol diameters
- with a safety lock preventing unauthorized persons from working with the machine.

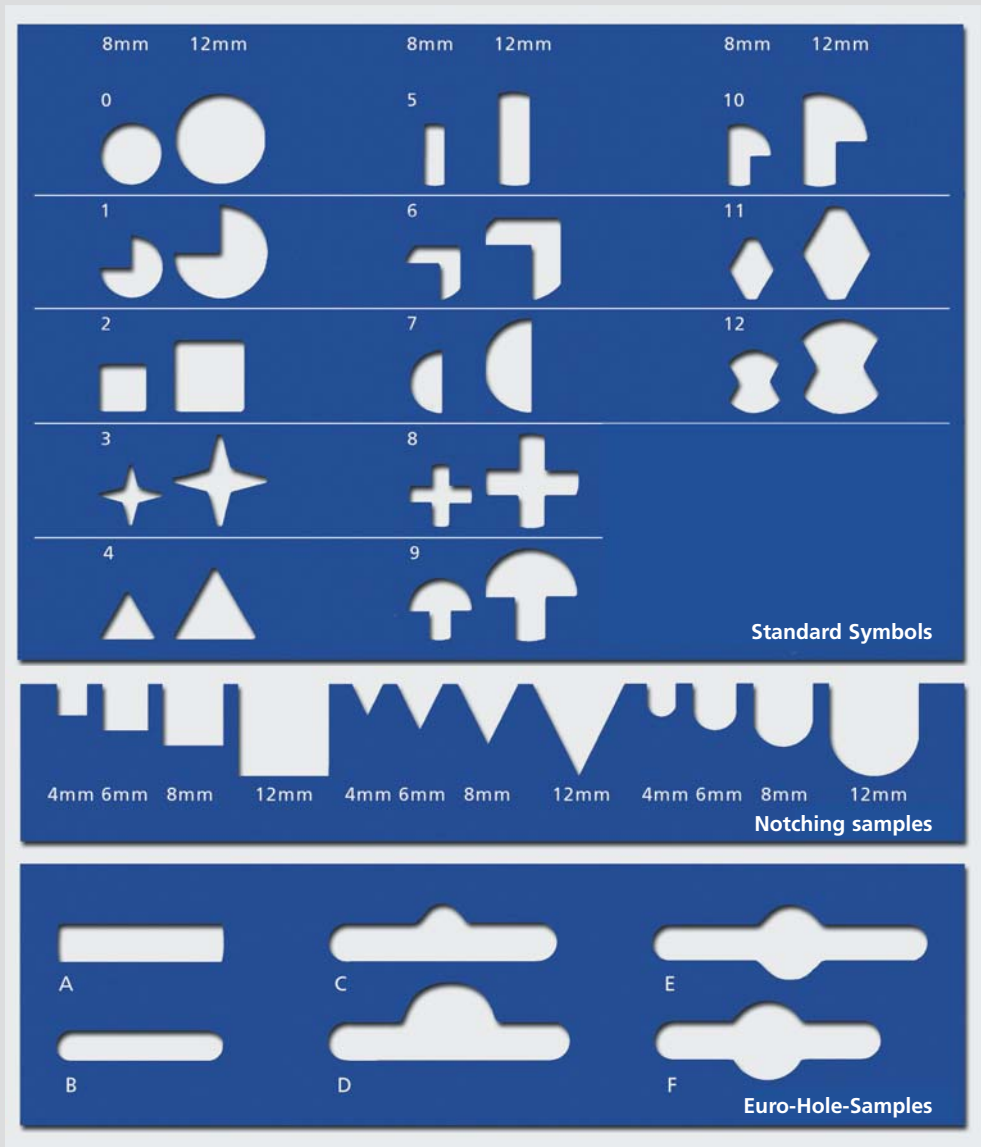

PERNUMA PERFOSET II/LA

with an insertion depth of about 50 mm and a capacity of about 100 sheets of 70 g paper which corresponds to a paper stack of 10 mm height. The hole diameter is 8 mm in general.

The chosen symbols are on punching die units which can be exchanged easily and fast one against each other.

The machines cannot be equipped with an adjustable rear gauge because of the punching die unit which is one integral part. For an extra charge an adjustable side gauge is available.

All symbol punching machines are equipped with a symbol of your choice. Please pay attention to our standard symbols no. 0 – 12 on the reverse of this page.
