## PERNUMA METALLPRINT E/ES Embossing Machines

**Electric embossing machine for marking cardboard, plastic, leather, film, wood, aluminium, etc..**

Suitable for fitting of a numbering head (even a double numbering head) or a type holder.

The machines are equipped with an adjustable side and rear gauge in their standard version in order to facilitate an exact positioning of the punching.

In special version the machine is available with quick-change-over device – when several numbering heads or type holders have to be used in one machine. (attention: modified fitting heights),

The embossing pressure can be adjusted to the thickness and kind of the various materials will be processed with these machines.

The embossing is released by the foot-switch which belongs to the standard equipment.
