

Type holder with quick-change-over device

PERNUMA METALLPRINT I

Hand-operated Number Embossing Machine

Hand-operated efficient embossing machine for making cardboard, plastic, film, leather, wood, aluminium, etc.

The machine is suitable for fitting of a numbering head or type holder.

The machine is equipped with an adjustable side and rear gauge in order to facilitate an exact positioning of the embossing.

In an optional version METALLPRINT I is available with quick-change-over device for using several numbering heads or type holders in the same machine (attention: modified fitting heights).

The embossing pressure can be adjusted to the thickness and kind of the various materials will be processed in this machine.

Special Options

- Heating system
- Automatic foil or ribbon transport for colour markings
- Special feeding / insertion systems
