

Film banderoling machine, type BP 800

- For shrink packaging of single or multipacks
- Film unwinding units laterally arranged for fast roll change and user friendly access

Technical Data:

Product infeed:	automatic or manual
Film:	PE flat film, roll diameter up to 350 mm
Product dimensions:	L: from 80 mm, W: max. 700 mm, H: max. 400 mm
Operation:	intermittent
Output:	1.800 cycles/h
Drive assembly:	frequency controlled
Power requirement / consumption:	approx. 3 kW
Control:	Siemens S7

Equipment:

- Robust steel construction, painted
- Electro-mechanical transverse welding movement with safety photocell
- Permanently heated welding element for strong seam welding
- Temperature adjustable by electronic control units
- Film unwinding unit for flat film at the top and at the bottom, arranged laterally
- Power driven film supply for the top and the bottom
- Film end control for top and bottom film (with re-monitoring)
- Product detection by photocell
- Film dispenser for the top and bottom film
