

## DIBIPACK 6084 EV

### EXTRA-LARGE SHRINK-WRAPPING

In addition to small-size wrapping machines to pack small and medium products, Italdibipack offers also **EXTRA-LARGE “one-step®” systems**, the **Dibipack BIG**, the **largest models of the Dibipack Evolution line**, conceived and designed in order to be the winning answer to the increasing demand of a large-size machine with great capacity and high performances. Ideal to wrap products of large dimensions, with wide surface, such as frames, pictures, panels a.s.o.

These "giants" have the same specifications as the shrink-wrapping machines of the *Dibipack Evolution line* but with some peculiarities: such as **two hold-down solenoids that keep the hood closed during the working cycle**, **two fans that grant a better circulation of warm air during shrinking**.

The machine works with PVC (**BLUE FILM**), polyolefin hot thermo-sealing and also shrinkable films (**GREEN FILM – GOLDEN FILM**)

Machine made according to CE rules.

SPECIFICATIONS	DIBIPACK 6084EV
Power supply	380 V- 3 Ph
Maximum power required	7 KW
Overall machine dimensions L x W	1940 x 950 mm
Working plate height (on stand)	920 mm
Machine weight	180 kg
Sealing area W x L	600 x 840 mm
Maximum product height	200 mm
Impulse sealing system	Bottom blade
Maximum roll dimensions DIA x W	250 x 800 mm
Output	4 - 8 pcs/min

notes: **Technical data subject to variations without prior notice**  
**Output depends on the operator and the type of the package**
