

MEC-PACK BIG

THE FULLY AUTOMATIC 'GIANTS' OF SHRINK-WRAPPING

The Mecpack line of automatic "L"-sealers includes also some EXTRA-LARGE models, Mecpack BIG e Mecpack XL, that distinguish themselves for their state-of-the-art technology and for the high performances in any application fields with products of large size. They work full automatically: the only thing the operator has to do is just to put the products on the in-feed conveyor because a system of photocells controls the whole wrapping process by itself. On request, the standard models can be equipped with different options, with special in-feed or discharging conveyors and with other particular applications, in order to increase performances far more.

SPECIFICATIONS	MEC-PACK BIG	TUNNEL 6825
Power supply	400 V - 3 Ph + N + T	230 - 400 V - 3 Ph + N + T
Power required	2,1 KW	10 KW
Overall machine dimensions L x W x H	2390 x 1150 x 1450 mm	2200 x 1080 x 1360 mm
Working plate height	780 mm	780 mm
Tunnel entrance dimensions W x H	-	680 x 250 mm
Tunnel lenght	-	700 mm
Machine weight	600 kg	130 kg
Minimum sealing dimensions L x W	120 x 120 mm	-
Maximum sealing dimensions L x W	750 x 600 mm	-
Maximum product height	150 mm	-
Minimum film width	250 mm	-
Maximum film width	700 mm	-
Compressed air consumption	0,5 NI/cycle	-
Compressed air pressure	6 bar	-
Output	Up to 1500 pcs/h	-

Note: Technical data subject to variations without prior notice
Output depends on the operator and the type of article to be wrapped.
