Non-driven curves

Fixed curves with conical rollers

Facilitate optimum curve tracking. The rotation speed of the roller always corresponds to that of the item irrespective of whether the item travels on the inside or outside curve.

The curves are available with guide profiles on both the inside- and the outside.

Low guide profile = H1.
High guide profile = H2.

Low guide profile = H1.
High guide profile = H2.

- Suitable for fairly heavy items and for items that call for extra good curve tracking.
