

PALLETISING

- PALLETISING ROBOTS
- PALLET LOADERS
- ACCESSORIES

Pallet loader

Layer by layer.

The pallet loader can operate as a semi automatic unit, or it can be integrated into a fully automatic palletising system.

More on the pallet

All cases, including heavy and bulky ones, can easily be stacked to heights of 2500 mm in order to fully utilise the capacity of lorries and containers.

Safe to operate, simple and versatile

The machine requires minimal maintenance and is easy to service. The machine is available with either left or right-hand operation.

Simple and safe operation

The software is simple and self-explanatory, and is operated using a finger touch panel. When the stripper plate is filled, the operator steps onto a safety mat that deactivates the machine. The machine is supplied with safety screening.

Stainless steel for wet environments

The pallet loader and the rest of the product range are available in galvanised or stainless steel.

The machine can be ordered in special colours at a surcharge.

The ball table facilitates transfer to the stripper plate (accessory).

On the stripper plate, the operator forms the desired pattern.

By a simple press of a button, the case layer is transferred to the pallet.

Grass with a height exceeding 2.40 metres

Investment in a new packaging line has yielded an improved working environment, higher productivity, and lower transport costs (Prodana Seeds).

The SOCO SYSTEM

From case erecting to pallet securing

The SOCO SYSTEM product range handles cases, plastic crates, trays, pallets, and many of your products.

The SOCO SYSTEM product range is designed to increase efficiency and eliminate physically strenuous work functions.

One system – one supplier

There are many advantages of full product compatibility; less paperwork and no time wasted in adapting products from different suppliers.

Meet your future requirements

Add modules and functionality, relocate modules, or whatever fits your future needs.
